INSIDE THIS ISSUE

RECAP

In the previous issue of ON THE WALLS, you have been introduced to our URBAN CONCRETE decorative coating series. So, what's new in this issue?

Imitating the textures of natural stones, our *NATURALE* collection is now in the house to freshen up your space, bringing nature closer to you. Take a read to find out more!

WHO ARE WE

Founded in 2018, Wallco Holdings is a quick growing Singapore based company specializing in Wall & Floor texture coatings.

Here in Wallco, we believe colours and textures are more than just mere decorative elements. They tell stories and they create unique connections between a space and its users. And we, are committed to help you tell your stories.

FRESH

NATURALE is a series of microporous decorative coatings formulated on the specific properties of materials such as lime hydrate, air lime, purified clay, selected marbles, and natural sands et cetera. Composing of these mineral nature materials with strong connotations to healthful and fresh living, *NATURALE* is an excellent choice for indoor applications.

ROBUST

Formulated under stringent guidelines, all materials are appropriately balanced to ensure the highest quality of *NATURALE* can be achieved. With the clay component creating a robust structure of particles, and the usage of natural lime bonding all materials, the structure is further reinforced, making it durable enough to withstand the harsh exterior conditions for outdoor applications as well.

Fine Living

SOPHISTICATION

Imitating the textures of natural stones such as Granite (with natural granite filler), Limestones, Sandstones, Marble and Pearlescent effect et cetera, go back to the basics with *NATURALE* and relive the ancient story. Experience living to its finest with these contemporary textures that adds value and subtle character to your space. *NATURALE* is a collection of easy to apply decorative coatings, that brings you exquisite and elegant living without compromising on its quality.

SELECTION

From light to warm colours, smooth to crinkled textures, striated patterns to pearly accents, *NATURALE* have it all. Find out more details today!

More colours and textures are available in our *NATURALE* series

Did you know?

Limestones can be good for people. Many sodas and antacid tablets for heartburns that we consume today all contains the active ingredient Calcium Carbonate, which are mined from Limestones. So, the next time you take a burp after drinking something carbonated or consume the Gaviscon, remember you are taking a rock to settle your stomach.
